

Guidelines for users' data stored on the supercomputer Fugaku

January 30th, 2020

RIKEN Center for Computational Science

This document is an English translation of the document written in Japanese and is for information purposes only. Users should also refer to the "Regulations for Use of the Supercomputer Fugaku."

The RIKEN Center for Computational Science (hereinafter referred to as "R-CCS") shall manage users' data on the supercomputer Fugaku as specified below.

1. Files stored on the supercomputer Fugaku by the users

R-CCS shall treat programs, data necessary for calculations, and calculation results stored on the storage devices of the supercomputer Fugaku (hereinafter referred to as the "Files") by users who are permitted to access the supercomputer Fugaku in accordance with the guidelines below.

- (1) R-CCS takes necessary preventive measures and manages the Files properly to prevent leaks and loss or damage of the Files.
- (2) R-CCS does not access the Files except when troubleshooting or improvement of the Fugaku system necessitates access to the Files.
- (3) R-CCS does not backup the Files. Users are expected to backup their Files if necessary.
- (4) R-CCS shall promptly delete the Files that are kept on the storage devices for a month after expiration of the user's allotted period of use of the supercomputer Fugaku.

2. Data collected by R-CCS

R-CCS shall collect the following data (hereinafter referred to as "Data") during the operation of the supercomputer Fugaku:

- Job Information
Information of jobs, such as the history of the job execution, etc.
- Job Scripts
The scripts used for the job execution
- Performance Information
Information of the program performance, such as FLOPS, memory throughput, power consumption, usage of the power-knobs, file I/O, etc.
- Compiler Information
Information of compiling, such as the library used, the compiler used, programming model, etc.
- File Information
Information of files kept on the storage devices, such as the file size, creation date, update history, etc.

R-CCS shall treat the Data in accordance with the guidelines below.

- (1) R-CCS shall use the Data for the purpose of analysis of the program performance and system usage to improve the usability by the users, and not for other purposes.
- (2) R-CCS shall not disclose the Data to third parties except in the following cases:
 - ① When operation and maintenance of the supercomputer Fugaku are outsourced to a third party, and handling of the Data by the third party becomes necessary. In this case, the third party personnel conducting the operation and maintenance work shall observe the provisions of these guidelines.
 - ② When collaborative research with other institutions is conducted to improve the system operation. In this case, the collaborating institutions shall observe the provisions of these guidelines.
 - ③ When research on improving the system operation is published, or disclosure of the Data improves the usability by the users. In this case, the disclosed information shall be de-identified and shall not contain any identifiable personal information. Generally, the information used for research publications is kept for 5 years.
 - ④ When disclosure is requested by legal process.
 - ⑤ When disclosure is requested by the project administrator.
